students have the opportunity to

earn £455 a week

in June/July 2026 on the DFE Internship
scheme* to learn about teaching in one of
Britain's top comprehensives:

St Mary's College, Hull

Try Teaching

There has never been a better time to consider a career as a teacher of Mathematics, Chemistry, Physics, Design Technology, MFL, Computing or Catholic RE. The Department of Education is offering undergraduates in their second, third or final years and master's students in these subjects the chance to apply for a 3-week-long paid internship to find out first-hand what a varied and exciting career teaching can offer.

St Mary's College, Hull

As an outstanding co-educational 11-19 Catholic comprehensive with a vibrant Sixth form and strong commitment to high performance in sport, there could be no better place to find out whether teaching is the career for you.

"My internship was very busy and I loved every minute of it. I am very grateful for this opportunity and would encourage anyone who is considering any career in education to try it out."

- Chris [Mathematics intern]

"This was an intensive and well-structured course, at a brilliant school with supportive staff. Training sessions were provided on a whole range of topics and weekly mentoring sessions helped me to make the most of my time. I'm glad my first secondary school teaching experience was in a school of such high quality and I'd thoroughly recommend it to everyone."

- Sehaj [Physics intern]

Interns with their course tutors

Valuable training

Training seminars will be led by experienced teachers to help you learn from your experiences. Q&A sessions with a range of school staff in central and senior leadership positions will help you explore the different career paths that teaching can provide.

Memorable experiences

During your placement you will have the opportunity to gain wider school experience by being involved in other school activities and events.

There will also be quizzes and sports activities to help you meet and make friends with the other interns, and an optional programme of follow-up events to help you stay in touch with St Mary's College and keep up-to-date with teaching opportunities.
